

Industrial Automation with PLC

Programmable Logic Controllers

Scope:

Train Industrialists & Youth to work in an automation environment using PLCs, sensors and actuators.

For whom:

Engineers, Technicians, Eng./Tec. students & Tech-enthusiasts.

Course Content:

- 1. Fundamentals of PLCs**
- 2. Introduction to S7-200 & S7-1200 PLCs**
- 3. Advantages and limitations**
- 4. Industry environment and PLCs**
- 5. I/O devices**
- 6. Ladder programming**
- 7. Touch Panel - Human Machine Interface (HMI)**
- 8. Simulation of PLCs & HMIs**

Duration: 5 Days (Weekends)

Registrations are now open for the 38th PLC course.
